SUMMARY

SAP S/4HANA Sourcing and Procurement consultant focused on SAP MM configuration, procure-to-pay, inventory management, valuation, MRP, special procurement, and FI-MM integration. Combines hands-on S/4HANA MM implementation practice with real warehouse operations experience at Amazon and 15+ years in enterprise technology consulting, including 7+ years supporting DACH clients. Brings practical warehouse operational insight, SAP MM configuration capability, and senior stakeholder-management experience to translate business requirements into scalable SAP S/4HANA procurement, inventory, and merchandise management solutions while supporting enterprise transformation initiatives. Completed a fully documented end-to-end SAP S/4HANA MM implementation aligned with SAP Best Practices, with portfolio evidence available on GitHub and LinkedIn.

Key Operational Strengths:

- Business process understanding from real warehouse operations.
- Internal and external stakeholder coordination across procurement, operations, IT and legal.
- Project governance across delivery cadences, risk tracking, stakeholder alignment, and executive steering meetings.
- RFP and commercial documentation experience.
- DACH Client-facing communication and cross-functional collaboration during transformation projects.

PROJECT EXPERIENCE

SAP S/4HANA MM implementation project

Manufacturing-company scenario covering an end-to-end SAP S/4HANA MM implementation from enterprise structure and master data through procurement execution, inventory management, material valuation, MRP, and special procurement.

Full SAP S/4HANA MM project documentation and configuration evidence available via GitHub portfolio.

- Designed and configured the complete enterprise structure including Company Code, three Plants (Düsseldorf, Dortmund and Stuttgart), Purchasing Organization, Purchasing Group and Storage Locations, together with Material Master, Business Partner, Purchasing Info Records and Source Lists.
- Executed the complete procure-to-pay cycle, including RFQ comparison, PO creation, goods receipt, invoice verification, three-way match, pricing procedure ZDM01, and multi-level PO release strategy.
- Configured Material Ledger, Actual Costing, Split Valuation for three quality grades, parallel currencies and OBYC Automatic Account Determination supporting complete FI-MM integration.
- Set up MRP Live, reorder point planning, PIRs, auto-PO conversion (ME59N), STO, consignment, subcontracting with BOM based component consumption (movement types 541/543), batch management, and special procurement scenarios.
- Configured and executed complete warehouse inventory processes including Goods Movements, Physical Inventory (MI01–MI07), Batch Management and Stock Control scenarios.
- Documented complete implementation, configuration rationale and L2/L3 troubleshooting scenarios, with portfolio evidence available through GitHub and LinkedIn Featured section.

CORE SAP MM COMPETENCIES

- **Procure-to-Pay (P2P)** — PR, RFQ, PO, GR/GI (MIGO), MIRO, Three-Way Match; Pricing & Invoice Controls
- **Inventory & Warehouse Management (Bestandsmanagement und Lagerlogistik)** — Movement Types, Stock Transfers, Reservations, Physical Inventory, Bin and Batch Handling
- **Material Valuation & Account Determination** — Split Valuation, Batch Management, Material Ledger, Actual Costing, OBYC, GR/IR Clearing, FI-MM Integration
- **Special Procurement and MRP (Sonderbeschaffung und Disposition)** — Stock Transport Orders (STO), Consignment (MRKO), Subcontracting, MRP-driven Procurement
- **Enterprise Structure and Master Data (Unternehmensstruktur und Materialstamm)** — Material Master, BP Vendor, Info Records, Source Lists, Company Code, Plant, Storage Location, Purchase Organization & Group
- **Release Strategies and Cross-Module Integration (Freigabestrategien und modulübergreifende Integration)** — Classification Workflows, Flexible Workflow, MM-FI, MM-SD, MM-PP (MRP/BOM Planning)
- **SAP Joule AI Copilot** — Conversational procurement assistance within Ariba, supporting navigation, transactional queries, and procurement insights
- **SAP Fiori, Ariba & Troubleshooting** — Fiori Apps, Ariba Buying & Invoicing, Guided Buying, Approval Workflows, GR/IR Mismatches, Pricing Errors, Release Failures

PROFESSIONAL EXPERIENCE

Warehouse Operations and Supply Chain Process Associate

Amazon Logistik | Mönchengladbach, Germany *09/2024 - Present*

- Pursued hands-on warehouse operations to ground SAP MM configuration knowledge in real-world logistics practice.
- Gained direct experience across inbound receiving and outbound fulfilment operations, building practical fluency in goods receipt, goods issue, stock movements, cycle counting, bin accuracy, and storage location management.
- Developed a functional understanding of how real warehouse operations translate into SAP MM inventory and master-data concepts, including plant structures, storage locations, bin management, batch tracking, and movement-type logic.
- Built practical awareness of WMS to ERP integration requirements in high-volume distribution environments, and strengthened understanding of how operational logistics interact with SAP MM processes.

Founder & Managing Director

SNTechSales Solutions UG | Düsseldorf, Germany *09/2023 – 11/2024*

- Established SNTechSales Solutions from zero, including legal formation, contracts, supplier onboarding, partner documentation, and compliance workflows required to operate as a technology reseller and implementation partner.
- Built and managed technology partner and reseller relationships across AWS, Microsoft, TD SYNNEX, Salesforce, and Creatio, including vendor qualification and Volkswagen Group supplier registration.
- Managed sourcing, quotations, RFP responses, supplier portals, and public-sector volume procurement as an authorized TD SYNNEX reseller, while delivering a back-office automation PoC for an asset-management customer.

Senior Manager, Client Services

Nous Infosystems | Düsseldorf, Germany *01/2020 – 08/2023*

- Served as account lead and primary relationship partner for DACH enterprise clients, supporting SAP S/4HANA transformation, procurement modernization, and digital-transformation programs from stakeholder alignment through delivery governance.
- Supported a global retailer's SAP S/4HANA transformation across 150+ procurement and supply-chain interfaces, improving integration readiness through stakeholder alignment, testing validation, and go-live risk resolution.
- Governed a 20+ member onsite/offshore team across testing, delivery governance, risk management, and executive steering cadences, strengthening delivery control for procurement, supply-chain, and cross-module workstreams.
- Managed multi-tier governance cadences including daily delivery syncs, weekly project reviews, and monthly executive steering meetings with client leadership.
- Led RFP analysis and proposal development for SAP S/4HANA/ECC transformation, procurement modernization, cloud, data, and automation initiatives.
- Supported enterprise transformation initiatives including AI/ML predictive maintenance and data migration pilots for a €20B European industrial manufacturer.

ERP & Technology Consulting — Various Roles

Axiom Software Solutions | OSI Digital | Hitachi Consulting | Innominds | Germany - India - USA *05/2009 – 12/2019*

- Built a 10-year foundation in SAP ECC, supply chain processes, enterprise systems, requirements analysis, functional testing, QA, and ERP/IT support across US and European engagements.

EDUCATION

Executive MBA *2012*

Indian School of Business Management & Administration | Hyderabad, India

Bachelor of Engineering — Electronics & Communication *2003*

Periyar University | Salem, India
